

# COVID-19 outbreaks in Australian residential aged care homes

## National snapshot

As at 8:00 am 21 November 2024, there are 1,393 active COVID-19 cases reported in 204 active outbreaks in residential aged care homes (RACHs) across Australia. There have been 95 new outbreaks, 12 new resident deaths and 1,154 combined new resident and staff cases reported since 14 November 2024.

Table 1: Aged Care COVID-19 data as at 8.00am 21 November 2024<sup>1</sup>

Residential aged care homes with active outbreaks are included in [Appendix](#).

Data collected from 31 March 2020 including retrospective data on outbreaks and cases from 18 February 2020.

Table 2: Overview of active outbreaks in Australia

	ACT	NSW	NT	QLD	SA	TAS	VIC	WA	Total
Total RACHs with outbreaks	5	35	1	20	19	10	93	21	204
Total number of active resident cases	14	177	21	73	105	57	461	117	1,025
Total number of active staff cases	6	33	8	46	32	18	170	55	368
Total outbreaks opened in previous 7 days	2	19	1	11	9	5	39	9	95
Total outbreaks closed in previous 7 days	0	20	0	12	6	1	23	7	69

<sup>1</sup> Outbreak opening and closure includes changes in the status of exposure sites to outbreaks (and vice versa), which are applied retrospectively to facility records. New case information can also change the status of a recovered site back to an active outbreak site. As a result, changes in active outbreak status may not align with day-on-day variations to active totals. These adjustments will also affect the number of cases in staff and residents reported each week.

<sup>2</sup> Active residents and staff cases are the total currently positive cases in active outbreaks.

<sup>3</sup> An outbreak is considered to be active pending advice from the relevant Public Health Unit. An outbreak is defined as at least 1 (one) positive case in a resident or 2+ cases in staff.

## Mortality

For the period of 1 January 2024 to 9 November 2024, COVID-19 is recorded as the cause of death in 1.9% of all deaths in permanent residents in aged care homes.

Since the beginning of the Omicron outbreak in mid-December<sup>4</sup> 2021, there have been 174,411 deaths in residential aged care from all causes (report period from 15 December 2021 to 9 November 2024)<sup>5</sup>. COVID-19 deaths account for 3.6% of this figure.

There has been a decrease year on year for the rate of case fatality<sup>6</sup>, from a 33% case fatality rate in resident COVID-19 cases in 2020 to 3.3% in 2022 and 1.8% in 2024.

Over the course of the pandemic, all-cause excess mortality in residential aged care was below expected numbers in 2020, and within expected range in 2021. In the first half of 2022, all-cause excess mortality in residential aged care was above the expected range. Excess mortality for the second half of the 2022 is yet to be finalised.

**Figure 3: COVID-19 deaths in RACHs overlaid with community deaths**

<sup>4</sup> The Omicron outbreak start date has been redefined from late November 2021 to mid-December 2021. Changes have been made to align reporting with the start date of Omicron published in the department's external facing Epidemiology report.

<sup>5</sup> The department is now accessing aged care deaths data from the SIEBEL dataset. Figures are live and subject to change. Source: Department of Health and Aged Care unpublished data / SIEBEL dataset.

<sup>6</sup> Case fatality calculated as total reported resident COVID-19 deaths divided by total resident COVID-19 cases.

## Workforce in active residential aged care outbreaks

As at 20 November 2024, surge workforce providers report a total of 199,508 shifts delivered in aged care services impacted by COVID-19. These shifts include roles for GPs, nurses, care workers, allied health workers, executive and ancillary staff. In the past week surge workforce providers have reported assisting 4 residential aged care homes and filled 88 shifts in aged care services.

## Oral antiviral treatments

Distribution of the oral anti-viral Lagevrio (Molnupiravir) commenced on 6 February 2022 to all RACHs with outbreak sites prioritised for delivery. The National Medical Stockpile has deployed 48,269 treatment courses of Lagevrio (Molnupiravir) to RACHs.

140,970 prescriptions for Lagevrio (Molnupiravir) have been issued to residents in RACHs, with a further 19,025 prescriptions for Paxlovid (nirmatrelvir + ritonavir) also issued since 28 February 2022 and up to 31 October 2024.

*\*Note: Oral antiviral data is only being updated monthly.*

## Vaccination in RACHs

On 29 February 2024, recommendations for 2024 COVID-19 vaccinations were released. Recommended doses for the program in 2024 are based on an individual's age and level of severe immunocompromise.

In 2024, those aged 75 years and over are recommended to get a COVID-19 vaccine dose every 6 months. Those aged over 65 years of age, and adults with severe immunocompromise are recommended to receive a COVID-19 vaccine dose every 12 months and are eligible to receive a COVID-19 vaccine dose every 6 months based on individual risk-benefit assessments. All other adults can receive a single dose this year.

Recommendations can be found on the Department of Health and Aged Care (department) website at:

<https://www.health.gov.au/our-work/covid-19-vaccines/getting-your-vaccination/booster-doses>.

People are encouraged to seek vaccination advice from their healthcare providers, specific to their circumstances.

People living in residential aged care are a high priority for the Government's COVID-19 vaccination program.

Older age remains the biggest risk factor for severe COVID-19 disease. Vaccination offers added protection to help reduce the risk of severe illness or hospitalisation of aged care residents.

The department is working with both the aged care and primary care sectors to ensure residents have access to the COVID-19 vaccine. The department continues to target support for RACHs to arrange COVID-19 vaccinations with local primary care providers such as GPs, community pharmacists and Aboriginal Community Controlled Health Services.

As at 20 November 2024:

- 72.7% of aged care residents have received a booster dose in the last 12 months.
- For residents over the age of 75:
  - 88,841 (53.5%) aged care residents received a booster dose in the last 6 months.
- 8,258 aged care residents have received a vaccination in the last 28 days (compared to 8,763 in the 28 days prior).

Data in this report is sourced from Australian Immunisation Register (AIR) data of residents in permanent residential aged care homes.

An updated data methodology was implemented on 17 October 2024. Aged Care AIR data as at 20 November 2024; Matched AIR data uses a snapshot of permanent residents in residential aged care homes as at 31 August 2024. The Residential Aged Care Home (RACH) Recipient ID to Medicare PIN linkage file was loaded into Health Enterprise Data Warehouse on 23 September 2024 which linked Medicare Consumer Directory data as at 11 October 2023 and RACH recipient data as at 31 May 2024.

Note: Booster doses in this report refer to any dose 2 or above administered to an individual.

## Infection control and audit

The Aged Care Quality and Safety Commission (Commission) conducts site audits and assessment contacts (site and non-site) to monitor and assess residential aged care services against the Aged Care Quality Standards (see Table 5 below). This may include conducting infection control monitoring (ICM) spot checks.

An ICM spot check involves an on-site visit to residential aged care services, without an outbreak, to observe infection control practices, to ensure that staff, management, and visitors are adhering to safe personal protective equipment protocols and to safe infection control arrangements, as required under the Quality Standards.

As at 21 November 2024, the Commission had conducted 6,068 ICM spot checks to observe infection control practices and PPE protocols in RACHs.

## Appendix: National residential aged care homes (RACHs) with active outbreaks COVID-19

Please note, information reported in this table has been directly reported to the department by RACHs.

'Total cases' refers to all staff and resident cases associated with the active outbreak and may not reflect the count of currently active cases.

Where numbers have been incorrectly reported, RACHs are able to correct these in the COVID-19 Support Portal through My Aged Care.

Where a RACH is reporting less than six resident or staff cases or less than six deaths, data has been suppressed to protect the privacy of affected individuals (note that "n/p" indicates data is not provided to protect privacy).

Data below for individual services is as at 21 November 2024.
